12:34 AM

Video: $x^2 + y^2 = 9$

1. $X^3 + y^2 = 6$
2. $X^2 + xy + y^2 = 7$
3. $6X^2 + 7\sin y = 1$
4. $E^x + y^2 = 10$
5. $X^2y + y = 3$

Challenge:

$x^2 + y^2 = 9$ (in terms of only x)

$X^2 + 2xy + y^2 = 7$ (in terms of only x)
